The focus in modern America is always on more. People fret about making more money, achieving more success, buying more things, and having more fun. What they don't realize is that all that worrying stops them from receiving what they truly need.

Joe Sweeney knows what it's like to live life in that fast lane. He's experienced success as a businessman, sports agent, and manager. However, like many people, Sweeney developed a smoldering discontent. His success wasn't making him truly happy, and he was trying to find more meaning and purpose in his life.

Sweeney's latest book, *After Further Review*, is an inspirational book that uses sports analogies to guide you to a similar revelation. His wisdom and advice come in the form of reflective questions, interactive exercises, action prompts, and other activities designed to make you think about your own path forward. Sweeney encourages you to start looking for something important, not simply something more.

It took slowing down to show Sweeney the truth. It didn't matter how fast he was going or how successful he became. He needed to decide what he really wanted from life. Putting aside distractions and diversions, Sweeney committed himself to a more purposeful existence, and now, he wants to help you do the same.

In this inspirational guide, Sweeney teaches you how to

- stop and reflect on your life,
- form a game plan for your future,
- see the big picture,
- find the wisdom in others,
- ask the right questions,
- discover the life you were meant to live, and
- realize that life has an expiration date.

Fun features like “go to the tape” reflections will help you internalize his message and transform your life.
